Pyr – fire {pyro-}

¹See note 3, p. 459. ²See note 2, p. 539. ³A disputed etymology; in this suggestion, a *pyramid*, like this tree, is shaped like a tongue of 'fire.' ⁴Ancient cosmologists taught about the *empyrean*, a realm of pure 'fire' which existed in the highest heavens, hence the adjective *empyrean*, 'lofty, sublime, elevated, celestial.'
